premium **steel** and **fiberglass** entrance **doors**

express your style

For the past **25** years, **MDL** Doors has been helping to **beautify** homes with superior quality pre-hung steel and fiberglass entrance systems, all with the level of service we know your family deserves.

After a late night fire devastated the original business, the brand was to live on as **MDL Door Systems**. Today we continue to promote **MDL's** original core values.

Our **highly** qualified staff share our passion for precise workmanship and attention to detail. All of our components are sourced from top quality manufacturers and assembled to ensure an **exceptional** fit.

From inception to completion, innovative **solutions** for your home.

express your **style**

The V800 with special order sidelites.

By the numbers

Before you explore the selection of doorlites and door styles, take a minute to get familiar with some of the language you might come across in this brochure. This will make it easier to choose an entrance system that's just right for you.

Brickmould

Decorative moulding used to finish the exterior face of the frame.

Tempered Glass

Heat-treated for added safety and strength. Triple glazing sandwiches the decorative glass and helps protect it.

Caming

Handcrafted metal that helps decorative glass styles take shape.

Doorlites

Glass inserts in various sizes and shapes that add decoration, light, airflow and privacy to your door.

Sidelites

Fixed decorative or clear glass assemblies attached adjacent to the door frame to allow more light.

Hinges

The plates and pins used to attach the door unit to the frame (not visible)

Door Frame

The wood structure that encloses and supports the entire door assembly (not visible)

Multi-point Locking System

Optional upgrade that adds greater security by securing the door to the frame in three places.

Profile

The high definition embossment produces deep shadow lines.

Sill

The horizontal bottom piece of a door including both threshold and substrate.

Weatherstrip & Sweep

The flexible seal surrounding the door panel and bottom sweep designed to stop air and water infiltration.

Steel Door

Steel doors are a perfect choice for an economical and worthwhile upgrade to your home. Their solid build gives you the strength and security you need. They provide excellent insulation and are weatherproof.

The face materials are corrosion resistant to keep them looking beautiful for the life of your door.

Steel doors are the perfect choice when you're looking for a durable and affordable entry system.

Standard Premium Features

- Smooth surface, paintable to match any decor
- High definition embossing
- Finger-jointed wood frames
- Optional vinyl clad frames
- Solid wood lock block
- Premium polyurethane foam core
- Ball bearing hinges
- Compression foam weatherstripping
- Standard Santoprene fixed door bottom sweep

Fiberglass Door

Textured Version

Whether they're smooth or textured, fiberglass doors offer the strongest and most secure option for your entranceway.

Fiberglass doors are dent resistant, provide excellent insulation and are resistant to heat and cold transfer.

While fiberglass smooth doors can be painted, a fiberglass textured door offers a wood like appearance with four times the strength of a wood door. Plus, they resist splitting, cracking and rot.

With their higher insulation values and durability, fiberglass doors are a smart long-term investment for your home.

Standard Premium Features

- Woodgrain-like textures
- Textured skin may be painted or stained
- Optional smooth surface
- Smooth surface, paintable to match any decor
- High definition embossing
- Finger-jointed wood frames
- Optional vinyl clad frames
- Solid wood lock block
- Premium polyurethane foam core
- Ball bearing hinges
- Compression foam weatherstripping
- Standard Santoprene fixed door bottom sweep

Features

Door Frame

A solid door starts with a sturdy frame. Choose between different brickmould sizes to accommodate narrow masonry openings; or vinyl clad frames in any of our standard colour options.

Aluminum clad frames are also available and required for some door systems when dark colours are required.

Ask your dealer for details

Any frame is able to become outswing with the addition of a wide bumper sill which provides a tight seal against air and water.

But, we don't stop there. Ask about our upgrade options including:

- Panic and closer blocking
- Deadbolt drilling
- Black compression weatherstripping
- Black sill
- Spring loaded hinges
- Special height
- Sill extenders

Paint

We offer **25** standard colour choices to give your home the right personality.

Please note that colours illustrated may vary due to printing technique.

Contact your dealer to view our official swatches.

Need something different?

No problem, we're happy to match our paint colours with your desired tint, tone and shade.

Options

Outswing bumper sills and perimeter weatherstripping make for an effective air and water seal that allows you to enjoy the benefits without sacrificing anything.

Custom Sidelites

Fixed sidelite size can be adjusted to match your existing frame opening. Upgrade to a full venting sidelite to let in nothing but a gentle breeze.

Custom Sizing

Increase or decrease your door or sidelite width and/or height. Some restrictions apply.

Brickmould Options

2", 1 1/2", or 3/4" brickmould is available to fit your opening, in a wide variety of colour options to match any decor.

Multiple Door Systems

We can accommodate anything from single, double, triple and quadruple door systems to suit your specific requirements. Height restrictions apply to door systems with transoms.

Transoms

Available in rectangular, extended segmental, elliptical and half round shapes. We can add a transom over single doors or large entrance systems. We recommend that the frame height of a transom not to exceed 36"-38".

Full Venting Sidelites

Get the benefits of a screen door without ruining the aesthetics of your new door system.

Full venting sidelites open to allow fresh air into your entranceway while still keeping out the elements.

Venting sidelites are not available with stain grade frames.

5'0 and 6'0 Replacement Terrace Door sizes are now available in Fiberglass Smooth or Fiberglass Textured.

5'0 uses 20" x 64" glass.
6'0 uses 22" x 64" glass.

Codes are Standard Sizes.

In place of TD, use RTD for replacement 5'0 and 6'0 sizes.

Standard Features

- Exterior sliding screen
- Hinged at center post
- Left or right operating
- Maintenance free polytex white
- One door operating/one door fixed

Note:

32" 32" terrace doors - use 20" x 64" glass (Steel and Fiberglass Smooth only)

36" 36" terrace doors - use 22" x 64" glass (Steel, Fiberglass Smooth and Fiberglass Textured)

Exception:

32" 32" in Fiberglass Textured - use 22" x 64" glass

Optional Features

- Vinyl clad white or painted colour
- Coloured screen and tracking
- Clear glass or internal grills
- Enclosed miniblinds
- Wide variety of hinge and swing options

Hinge Options Viewed from Outside

Available in Standard Sizes and Replacement Sizes

Codes are for Standard Sizes.
In place of TD, use RTD for replacement 5'0 and 6'0 sizes.

Terrace Doors

Enjoy the benefits of a terrace door without having to worry about losing space in the room. Add an outswing door to gain the flexibility you need. Operating like a casement window on one side, outswing venting terrace doors provide full height ventilation and a mounted screen. The other side is a door that provides easy passage, complete with a concealed closer assist that gently and automatically closes the door behind you.

VTD715IG
15 lite, white internal grill
(Argon) View from outside

VTD710
1 lite, no grill (Argon)
View from inside

Hinge Options

Establish the hinging of a door by standing outside, facing the door.

Concealed closer assist on operating door available on outswing venting terrace doors only.

- * Is manufactured using 32", 32" x 80" or 36" 36" x 80" Doors. Ideal for new construction
- * Other sizes are available by custom order - must be quoted
- * Venting Terrace Doors are not available with Stain-Grade Frames

Outswing Bumper Sill with a durable exterior aluminum tread, combined with a perimeter weatherstrip seal, results in an effective air and water seal.

Note: 32" 32" terrace doors - use 20" x 64" glass (Steel and FS only)
 36" 36" terrace doors - use 22" x 64" glass (Steel, FS and FT)

Exception: 32" 32" in Fiberglass Textured - use 22" x 64" glass

Std Vents

This door option eliminates the need for a screen door.
Made of tempered glass, standard vents are air and water tight when closed.

Tip: We do not recommend adding a vent or an internal glass to a fibreglass textured door. Standard vents are only available with a white doordlite frame.

S802V - Vent Clear (LowE/Argon)

S802IGV-Vent Internal Grill-Low E/Argon

Elevation Vents

This revolutionary venting unit is easy to open and allows you to select the degree of ventilation. It also eliminates the need for a screen door. It is a one step upgrade that allows you to bring a little bit of the outdoors inside.

The grills shown above are not available in two tone.

- *5/8" x 3/16"* grills are available in one tone or two tone in the MDL optional colours shown above by special order

Fantop lites are only available in *5/8" x 1/4"* Flat White Grills.

- All special order grill styles are LowE / Argon / Tempered providing maximum energy efficiency, strength, and durability.
- Rectangular and shaped transoms and custom sized doorlites are available in special order grill colours and styles shown.
- Standard doorlite sizes are Energy Star approved.
- SL14 full glass sidelites are available in grill patterns shown with or without kickplates.

Lock

Multi-point locking systems provide peace of mind and make our durable door systems even stronger. Factory installed multi-point locks feature a 1" centre deadbolt and latch and two additional anchoring points at the top and bottom. This helps provide greater resistance to forced entry as well as improved weatherstrip compression. All of our multi-point lock systems are made better by allowing easy re-keying if necessary.

Features

- Dummy handle sets can be used on the secondary operator of a Double Door system
- Multi-Point Locking Hardware anchors into the astragal of Double Doors
- 90 degree thumb turn to engage locking points

Benefits

- Provides more security
- Better weathersealing performance
- Helps reduce door warpage
- Easy to use - no lifting of the handle is required to engage locking points

Due to the extended length of 8' doors, a single point lock is not sufficient to maintain a positive weatherseal.

MDL Door Systems will not supply Steel, Fiberglass Smooth or Fiberglass Textured 8' doors without a multi-point lock.

Hardware Options
